

Please do not stop satellite radio from broadcasting local traffic and weather information. As an XM subscriber, I really appreciate the service they provide. The local stations should raise the level of their service and compete in the free market place. The more choice and competition we have as consumers is the american way. Do NOT listen to the lobbyists!! Pay attention to the regular people. If we are willing to pay for a service, then we should not be stopped by a special interest promoting their own cause. Let the free market work for consumers.

Thank You.
